OBC desk sign: printing

Two prints: the plaque (black, then gold) and the base (black).

1 Print the plaque face up

- **obc_desk_sign_plaque.3mf. Black for the plaque, gold for the letters.**
- With an AMS it swaps to gold once, at 5.2 mm, and prints gold to the top.
- With one spool: in the preview, add a pause at 5.0 mm, then load gold.
- About 2 h 20 m. 43.9 g black, 10.6 g gold.

2 Print the base

- **obc_desk_sign_base.3mf, in black. About 1 h 36 m, 46.6 g.**
- 0.2 mm layers, supports off, for both prints.

Design-review renders of the real parts, not photos. Black and gold are the print colours.

OBC desk sign: putting it together

Design-review renders of the real parts, not photos.

1 Slide the plaque into the slot

- **Letters to the front. Push it all the way down.**
- It leans back about 10 degrees on its own. No glue needed.

2 Done

Good

- Slides in by hand and stands steady.
- Every stripe is a clean black line.

Tell me

- if the slot is tight or loose,
- or any stripe or letter edge printed badly.

Design-review renders of the real parts, not photos. Black and gold are the print colours.
